About Me

I am a recent graduate in Electronics Engineering from Politeknik Negeri Semarang, with a strong academic background in mathematics and science. I am highly motivated and eager to apply my technical knowledge and practical skills in real-world engineering projects, particularly in the field of automation and control systems.

Education

2019 - 2022 | Senior High School Negeri 1 Lasem | Mathematics and Science Major

Developed strong analytical thinking and problem-solving abilities through intensive studies in physics, mathematics, and chemistry.

2022 - 2025 | Politeknik Negeri Semarang | Associate Degree in Electronics Engineering

Focused on practical and theoretical knowledge of electronics, instrumentation, microcontroller programming, automation systems, and electrical design.

Internship Experience

August 2024 - Dec 2024 | Internship | Ruang Industri Indonesia

Gained hands-on experience in industrial automation by programming Haiwell PLCs, designing user-friendly HMI interfaces, and developing a real-world Automated Storage and Retrieval System (ASRS) project.

Skills

PLC Programming (Haiwell) | HMI Design | Microcontroller (Arduino) | Electrical & Electronics Basics | Responsible | Teamwork | Technical Documentation
